Advanced pumping technology for industrial processes

Ruhrpumpen is your single source supplier

- Original Equipment (OEM)
- Spare parts
- Installation and startup support
- Repair and maintenance
- Engineering, training and consulting
- Reverse engineering

Benefits of our pumps:

- Proven reliability
- High efficiency designs ensure lowest operating cost
- Robust design allows for long system life with minimal maintenance
- Optimized total cost of ownership
Ruhrpumpen Industrial Pumps

Pumps find application in thousands of manufacturing processes around the world. They lie deep in the heart of hundreds of industries playing an essential role in the production and development of materials that support and improve modern life.

Regardless of their industry, manufacturers face many of the same challenges: from shorter product life-cycles to increasingly sophisticated customer demands.

As a highly-engineered pump manufacturer, Ruhrpumpen delivers cost-effective, custom made solutions for a wide range of industrial applications. RP Industrial pumps are engineered to perform in the most harsh and corrosive environments, while achieving the highest levels of safety and reliability.

From the chemical and petrochemical industries to pharmaceutical and food processing units, Ruhrpumpen's pumping solutions ensure an efficient and reliable operation throughout the entire operating cycle of your plant.

**Despite the application, Ruhrpumpen has the solution to handle the demands of your industry.**

Despite the application, Ruhrpumpen has the solution to handle the demands of your industry.

Our centrifugal and reciprocating pumps have proven their performance in a wide range of industrial applications such as:

- Process water
- Flood control
- Condensation control
- Dewatering service
- Agricultural irrigation
- Water treatment
- Water distribution and supply
- Seawater recirculation
- Washing and cleaning
- Wastewater handling
- Industrial refrigeration
- Pressure boosting
- Fire protection

RP offers more than 65 years of experience solving thousands of specific industrial needs in fluid transfer technology. Our customers can be sure that we are constantly developing more efficient pumps for new and existing industrial processes. Our pumps are used in a wide variety of industries, including but not limited to:

**APPLICATIONS & INDUSTRIES**

- Cooling & Thermal
- Marine
- Water & wastewater
- Automotive
- Chemical
- Food Processing
- Pharmaceutical
- Power Generation
- Oil & Gas
- Steel / Metal Refining
- Mining
- Fire protection
IPP
End suction pump, dimensionally compliant with the ANSI B73.1 standard

CHARACTERISTICS AND DESIGN FEATURES
- HI design (OH1), dimensionally compliant with the ANSI / ASME B73.1 standard
- Horizontal, overhung, single stage, end suction centrifugal pump
- Open impeller, provides hydraulic balance reducing axial thrust
- Back pull-out design for ease of maintenance
- Modular design concept
- Available in a wide range of metallurgies to allow operation with a broad variety of liquids

OPERATING LIMITS

<table>
<thead>
<tr>
<th>Capacity</th>
<th>up to 1,000 gpm</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>up to 227 m³/h</td>
</tr>
<tr>
<td>Head</td>
<td>up to 420 ft</td>
</tr>
<tr>
<td></td>
<td>up to 128 m</td>
</tr>
<tr>

APPLICATIONS
- Chemical
- Pharmaceutical
- Auxiliary services in power plants
- General industry
- Food processing
- Water and wastewater treatment
- Industrial refrigeration

CPP / CPP-L
Single stage, end suction ANSI process pumps (enclosed impeller)

CHARACTERISTICS AND DESIGN FEATURES
- HI design (OH1), compliant with the ANSI / ASME B73.1 specification
- Enhanced hydraulic design for low NPSH requirements
- Back pull-out design for ease of maintenance
- C-Frame option is available
- Optional cooling jacket and cooling coil for high temperature applications
- Available in ductile iron, stainless steel, duplex and alloy 20 (other materials on request)
- Available in 35 sizes to operate within a wide range of hydraulic parameters, including the CPP-L for low-flow, high-head applications

OPERATING LIMITS

<table>
<thead>
<tr>
<th>Capacity</th>
<th>up to 12,340 gpm</th>

<tr>
<td></td>
<td>up to 371 °C</td>
</tr>
</tbody>
</table>

APPLICATIONS
- Chemical and petrochemical
- Auxiliary services in power plants
- Agricultural irrigation
- Water treatment
- Food processing
- Pulp and paper
- Textile industry
- Pharmaceutical
- Tank farms
CPO / CPO-L

Single stage, end suction ANSI process pumps (open impeller)

CHARACTERISTICS AND DESIGN FEATURES

- HI design (OH1), compliant with the ANSI / ASME B73.1 specification
- Back pull-out design for ease of maintenance
- Open impeller design allows handling of solids in suspension
- Industry leading low NPSHR performance and high efficiencies
- C-Frame option is available
- Optional cooling jacket and cooling coil for high temperature applications
- Available in ductile iron, stainless steel, duplex and alloy 20 (other materials on request)
- CPO-L model for low-flow, high-head applications

OPERATING LIMITS

<table>
<thead>
<tr>

</table>

APPLICATIONS

- Chemical and petrochemical
- Auxiliary services in power plants
- Agricultural irrigation
- Water treatment
- Food processing
- Pulp and paper
- Textile industry
- Pharmaceutical
- Tank farms

GSD / GSD-C

Single stage, end suction general service centrifugal pump

CHARACTERISTICS AND DESIGN FEATURES

- HI design (GSD – OH0 / GSD-C – OH7)
- Maximum parts interchangeability to reduce costs
- Available in 28 sizes
- Semi-open, adjustable impeller
- Frame mounted as standard
- Back pull-out construction is available
- Packing or mechanical seal
- Cast iron as standard material (other materials on request)

OPERATING LIMITS

<table>
<thead>
<tr>
<th>Parameter</th>

<tr>
<td>Pressure</td>
<td>up to 175 psi up to 12 bar</td>
</tr>
<tr>
<td>Temperature</td>
<td>up to 250 °F up to 121 °C</td>
</tr>
</tbody>
</table>

APPLICATIONS

- Clear liquids or fluids with small solids in suspension:
  - Water supply systems
  - Agricultural irrigation
  - Construction dewatering
  - Recirculation
  - HVAC
  - Booster service

*For operation outside operating limits, please contact a Ruhrpumpen representative.
**SHD**
Solids handling pump, one stage

**CHARACTERISTICS AND DESIGN FEATURES**
- End suction, single stage
- Vertical and horizontal mountings available
- Designed to handle solids from 1 1/2" (38 mm) up to 6" (152 mm) in diameter
- Solids handling, non-clog design, hydraulically balanced impeller
- Sump pump configuration available
- Cast iron as standard material (other materials on request)

**OPERATING LIMITS**

| Capacity   | up to 10,000 gpm  
|           | up to 2,271 m³/h |  
| Head      | up to 380 ft  
|           | up to 116 m   |  
| Pressure  | up to 150 psi  
|           | up to 10 bar  |  
| Temperature | up to 122 °F  
|           | up to 50 °C   |  

**APPLICATIONS**
- Sewage
- Sanitary and industrial wastes
- Treatment and process wastes
- Storm and rain water
- Pollution control
- Wastewater treatment and management

**SWP**
Self-priming pump for solids handling applications

**CHARACTERISTICS AND DESIGN FEATURES**
- HI design (OH1A)
- Self-priming process pump
- Handles solids up to 3" (76 mm) in diameter
- Removable cover plate allows for easy access to impeller and seal to facilitate maintenance
- Availability of mounting above the liquid being pumped, maximum lift up to 25 ft. (7.6m)
- Available with or without trailer
- Cast iron as standard material (other materials on request)

**OPERATING LIMITS**

| Capacity   | up to 6,500 gpm  
|           | up to 1,476 m³/h |  
| Head      | up to 140 ft  
|           | up to 42 m   |  
| Pressure  | up to 83 psi  
|           | up to 5.6 bar  |  
| Temperature | up to 158 °F  
|           | up to 70 °C   |  

**APPLICATIONS**
Waste handling and sewage applications, it can handle clear liquids or with solids:
- Paper mills
- Food processing
- Wineries
- Steel industry
- Wastewater treatment
- Mine dewatering and groundwater control
Characteristics and Design Features

IIL

- HI design (OH5), dimensionally compliant with the ANSI / ASME B73.2 standard
- Space saving design allows for use in tight installations or modular packages
- Top pull-out design to simplify maintenance
- Protected one-piece shaft
- Flanged suction and discharge on common centerline
- Fully enclosed balanced impeller
- Stainless steel as standard material (other materials on request)

Operating Limits

<table>
<thead>
<tr>
<th>Capacity</th>
<th>up to 1,300 gpm up to 295 m³/h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head</td>
<td>up to 340 ft up to 119 m</td>
</tr>
<tr>
<td>Pressure</td>
<td>up to 350 psi up to 24 bar</td>
</tr>
<tr>
<td>Temperature</td>
<td>up to 350 °F up to 177 °C</td>
</tr>
</tbody>
</table>

Applications

- HVAC
- Chemical and petrochemical
- Pharmaceutical
- Water treatment
- Beverage industry
- General process
- Fire protection

IVP / IVP-CC

- HI design (OH4 / OH5)
- Fully enclosed, balanced, one-piece impeller design
- Split coupling simplifies maintenance (IVP-CC close coupled available)
- Top pull-out design for ease of maintenance
- Flanged suction and discharge on common centerline
- Coupling guard for protection during operation
- Cast iron as standard material (other materials on request)

Operating Limits

<table>

</tbody>
</table>

Applications

- HVAC
- Chemical and petrochemical
- Pharmaceutical
- Beverage industry
- Utility services
- Water supply systems
- Industrial refrigeration
- Fire protection

*For operation outside operating limits, please contact a Ruhrpumpen representative.*
HSC / HSD / HSL / HSR / ZW
Horizontal, single stage, axially split case pumps

**CHARACTERISTICS AND DESIGN FEATURES**
- HI design (BB1)
- High efficiency, foot mounted design
- Double suction, dynamically balanced enclosed impeller
- Mechanical or packing seal
- All HS/ZW pumps can be mounted vertically or horizontally
- Cast iron as standard material (other materials on request)

**OPERATING LIMITS**

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Capacity</th>
<th>Head</th>
<th>Pressure</th>
<th>Temperature</th>

</tr>
<tr>
<td></td>
<td>up to 31,800 m³/h</td>
<td>up to 673 m</td>
<td>up to 20 bar</td>
<td>10 °C to 150 °C</td>
</tr>
</tbody>
</table>

**APPLICATIONS**
- Cooling towers
- Water distribution and supply
- Water treatment
- Pulp and paper
- HVAC
- Dewatering
- Municipal water systems
- Fire protection

*See ZM line for API build

HSM
Horizontal, multi-stage, split case pump for high pressure applications

**CHARACTERISTICS AND DESIGN FEATURES**
- HI design (BB3)
- Two or four stage pump with double volute casing and side-side nozzle arrangement
- Double suction, dynamically balanced enclosed impeller
- Mechanical or packing seal
- Cast iron as standard material (other materials on request)

**OPERATING LIMITS**

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>up to 454 m³/h</td>
<td>up to 670 m</td>
<td>up to 51 bar</td>
<td>up to 121 °C</td>
</tr>
</tbody>
</table>

**APPLICATIONS**
- Chemical and petrochemical
- Cooling towers
- Municipal water systems
- Water pipelines
- Mining
- Fire protection
**VTP / HQ**

Multi-stage, vertical turbine pump with diffuser type bowl

**CHARACTERISTICS AND DESIGN FEATURES**

- HI design and API 610 latest edition (VS1) constructions available
- Collet mounted or ring and key, semi-open and enclosed impellers
- Threaded or flanged bowls are provided depending on pump size
- Up to 30 stages, number of stages according to requirement
- Basket or conical strainer available according to service conditions
- Can be built as a vertical canned pump (VS6)
- Standard materials include cast iron bowls, bronze impellers and 416 SS shafting (other materials on request)

**OPERATING LIMITS**

<table>
<thead>
<tr>
<th>Capacity</th>
<th>up to 60,000 gpm up to 13,630 m³/h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head</td>
<td>up to 2,500 ft up to 762 m</td>
</tr>
<tr>
<td>Pressure</td>
<td>up to 1,080 psi up to 74 bar</td>
</tr>
<tr>
<td>Temperature</td>
<td>up to 250 °F up to 121 °C</td>
</tr>
</tbody>
</table>

**APPLICATIONS**

- Deep well
- Sump drain
- Hydrocarbon service
- Offshore facilities
- Water intake
- Condensate extraction
- Municipal water systems
- Fire protection

**VSP / VSP-CHEM**

Single casing, vertical sump pumps

**CHARACTERISTICS AND DESIGN FEATURES**

- HI design and API 610 latest edition (VS4) constructions available
- Semi-open impeller for clean water applications and enclosed impeller for solids handling (non-clog model)
- Can handle water with solids up to 4" (102 mm) in diameter (non-clog)
- Sump mount or tank mount available
- Sump depth up to 20 ft (6 m)
- Cast iron as standard material for the VSP model (other materials on request) for the VSP-Chem materials are according to API 610

**OPERATING LIMITS**

<table>
<thead>
<tr>
<th>Capacity</th>
<th>up to 8,500 gpm up to 1,931 m³/h</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head</td>
<td>up to 425 ft up to 130 m</td>
</tr>
<tr>
<td>Pressure</td>
<td>up to 580 psi up to 40 bar</td>
</tr>
<tr>
<td>Temperature</td>
<td>up to 400 °F up to 200 °C</td>
</tr>
</tbody>
</table>

**APPLICATIONS**

- Water treatment
- Hydrocarbon processing
- Condensation control
- Automotive solvents
- Sump drainage
- Flood control
- Dewatering service
- Utility service
- Open or closed drain service

*For operation outside operating limits, please contact a Ruhrpumpen representative.*
Our fire protection pumping solutions can be found all around the world in a variety of industrial, commercial and residential applications. We are able to supply single pumping units or complete pre-packaged fire systems (with or without enclosure), always tailored and built to the requirements of the customer, ensuring that they meet international and local safety regulations.

**CHARACTERISTICS**

All pre-packaged systems accommodate any of the RP fire pump models with drivers, control systems and pipework on a common base for a plug-and-play-installation.

- Available with electric motor or diesel engine
- ETL/ETL third party listing components
- UL listed and FM approved components
- NFPA 20 full compliance
- NFPA 850 compliant
- Wide range of construction materials available. Metallurgies available for sea/brackish water application and harsh environments.

**APPLICATIONS**

- Commercial, municipal and residential high-rise buildings
- Large industrial premises and storage warehouses
- Offshore and remote facilities
- Airports
- Commercial centers
- Power stations
- Marine

**BENEFITS**

- Single source responsibility for complete system
- System is completely wired and factory tested
- Delivered on site in a single shipment, ready for installation
- Engineered to customer requirements
- International distribution and start-up capabilities
- ABS certification for offshore platform fire pump packages and fire skid units

Ruhrpumpen is an innovative and efficient pump technology company that offers highly-engineered and standard pumping solutions for the oil & gas, power generation, industrial, water and chemical markets. We offer a broad range of centrifugal and reciprocating pumps that meet and exceed the requirements of the most demanding quality specifications and industry standards such as API, ANSI, UL, FM, ISO and Hydraulic Institute.
